

Workforce Clarity

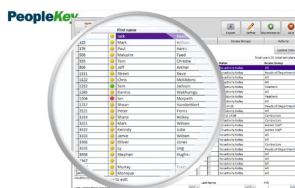

Online, real-time data management software

WorkForce Clarity is a real-time query, reporting and data management tool that is used in conjunction with FingerLan. Allowing users to quickly and easily run reports based upon the date, time, location, user, or type of biometric transaction.

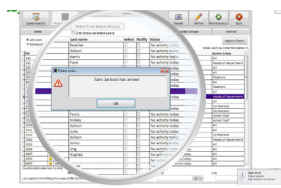

Specification

- General** Easily monitor live time & attendance data, run reports and monitor when employees are on or off site at any given time, utilising the PeopleKey biometric finger scanner
- Exporting** Once a report has been generated, it can be printed or exported as an Excel spread sheet
- Who's on site** Reporting utilises PeopleKey finger scanner data in real time, so it can be used as a tool to monitor which employees are at a given job site at any point in time. This is an ideal OHS auditing tool.
- Built-in alerts** Further to the "who's on site" reporting feature, Workforce Clarity can be easily be configured to sound or display a notification when a particular individual has clocked in via any one of the PeopleKey fingerprint readers on the network
- Filters** Workforce Clarity allows users to sort transaction data by date, time, location, user or type for reporting. This allows fine resolution reporting
- Column sorting** Data is sorted by column, allowing for a familiar spread sheet like interface
- Customised reports** Customised reports can be purchased on request
